

AAIRA WAJAHAT RAO

Multan, Pakistan | +92 334 7475355 | aairawajahat@gmail.com

PROFESSIONAL SUMMARY

Results-driven full-stack developer with hands-on experience in mobile and web application development. Proficient in Flutter, Kotlin, and Firebase with demonstrated expertise in building secure authentication systems, real-time database solutions, and responsive user interfaces. Proven ability to design and implement end-to-end solutions including admin panels, role-based access control, and API integration. Strong problem-solving skills focused on delivering user-friendly, scalable applications.

PROFESSIONAL EXPERIENCE

Flutter App Developer

Multan, Pakistan | July 2025 – September 2025

- Designed and developed mobile applications using Flutter with Firebase backend integration
- Implemented secure authentication systems and transaction processing functionality
- Integrated RESTful APIs and built modern UI/UX designs following Material Design principles
- Developed checkout systems and payment gateway integration

EDUCATION

Bachelor of Science in Computer Science

Air University Islamabad, Multan Campus | Expected Graduation: 2027

TECHNICAL SKILLS

Programming Languages: Dart, Kotlin, C++, Python, JavaScript, HTML, CSS

Mobile Development: Flutter, Android SDK, Material Design, Responsive UI

Web Development: MERN Stack, React, HTML5, CSS3

Databases: Firebase, MongoDB, SQL

Tools & Frameworks: Android Studio, VS Code, Git, GitHub, Firebase Console, REST APIs

KEY PROJECTS

Cross-Platform E-Commerce Application

Flutter, Firebase, Firestore | Admin Panel, Product Management, Real-time Database

- Built complete e-commerce platform with role-based access control for admin and customer users
- Implemented product browsing, shopping cart, checkout system, and order tracking functionality
- Developed admin panel for managing users, products, and deliveries in real-time

HR Attendance Management Application

Flutter, Firebase | Role-Based Authentication, Workflow Management

- Designed role-based authentication system for admin and employee access control
- Implemented leave request management with approval and rejection workflow
- Developed real-time attendance monitoring with late arrival and early leave detection logic

Coffee Shop Mobile Application

Kotlin, Android SDK, XML | Menu Management, Shopping Cart

- Developed Android application with menu browsing and shopping cart functionality
- Implemented role-based access control distinguishing between admin and customer interfaces
- Built order placement and management system with Material Design UI

CORE COMPETENCIES

- Full-stack mobile and web application development
- RESTful API design and integration
- Database design and management (SQL and NoSQL)
- Role-based authentication and access control
- Real-time data synchronization and management
- UI/UX design and responsive interface development
